FOREWORD

The statistics contained in this publication are based on monthly reports from Statistics Canada's External Trade Division which are provided to the Government of Prince Edward Island as a special tabulation under a purchase arrangement by the P.E.I. Development Agency. Statistics on international exports from P.E.I., by commodity, are provided for the years 1969 to 1984. Statistics for exports by country of destination are shown for 1977-1984. Data on the four major countries of destination; United States, Algeria, Venezuela and Trinidad-Tobago are given by commodity for the period 1980-84.

Export documents (bills of lading) collected by Canada Customs are the basic source of information on exports utilized by Statistics Canada. Exports are classified according to the Canadian International Trade Classification manual. The commodity codes are identified in the following tables as a number accompanied by a written description of the commodity. Commodities are divided into five main groupings: 1) Food, feed, beverage and tobacco products, 2) Crude materials (inedible), 3) Fabricated materials (inedible), 4) End products (inedible), and 5) Special transactions - trades.

The statistics show the value of exports from Prince Edward Island to have been $127.8 million in 1984, which compares to $12.3 million in 1969. About 57 per cent of total exports from Prince Edward Island in 1984 went to the United States. The major commodities exported from Prince Edward Island in 1984 were; potatoes and potato products - $52.4 million, fish and fish products - $37.1 million (of which lobster and lobster products account for $16.8 million), and evaporated milk - $10,8 million. These trade commodity groups accounted for 78.5 per cent of total exports from Prince Edward Island in 1984.

If any questions arise on these statistics please contact Terry Hogan at (902) 892-4168. The Economics, Statistics and Fiscal Analysis Division are indebted to Statistics Canada for supplying the data, the P.E.I. Development Agency for sharing this information, Baxter Ramsay for the cover design and most especially to Terry Hogan for his efforts in putting the report together.

SOURCE: Statistics Canada, special tabulation data from publications 65-003 and 65-004.

NOTE: (Province of Lading/Origin).

Prior to the 1984 data year, exports statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured. Products shipped to other provinces and subsequently loaded for export markets are presently not identified. Therefore all products exported from Prince Edward Island were not necessarily produced on Prince Edward Island.

(1) $ 3,282,218 of exports of fuel oil (# 43259 - heavy no. 4-6 and bunker) to the United states were erroneously credited to Prince Edward Island. These exports belong to the province of Quebec, so Prince Edward Island's total exports for 1984 were reduced accordingly.
